DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 40-48, and 51 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-39, 49-50, drawn to the processing of the designated print job associated with the paper output place information, classified in class 358, subclasses 1.9, 1.13.
 - II. Claims 40-48 and 51, drawn to the information of the processing of the specific job associated with the information of the used printer, classified in class 358, subclass 1.15.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention (I and II) has separate utility such as operating either independently or in combination with other subcombinations according to the particular claimed limitations which characterize the invention, without requiring the particular limitations which characterize the other invention(s), as indicated above. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper; and

Art Unit: 2624

Because these inventions are distinct for the reasons given above, requiring separate consideration and search, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 40-48 and 51 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Allowable Subject Matter

3. Claims 1-39, 49-50 are allowed.

Claims 1, 5, 9, 13, 26, 27, 35, and 49-50 are independent claims.

4. Applicant's arguments, see a line 9 of page 24 to a line 2 of page 22, filed 6/4/04, with respect to claims 1-27 and the new and similar claims 28-39, 49-50 have been fully considered and are persuasive. The previous rejection to claims 1-27 has been withdrawn. Thus, claims 1-27 and the new and similar claims 28-39, 49-50 are allowable based on the reasons from the line 9 of page 24 to the line 2 of page 22 of the argument.

Examiner's Remark

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Owa et al. (US Patent No. 6,348,971 B2) discloses a notifying control of causing the user interface unit to notify the information including information for enabling a user

Art Unit: 2624

to confirm which of the plurality of printers is used for specific job, when request data is issued in the case where plurality of printers is present in the system.

Conclusion

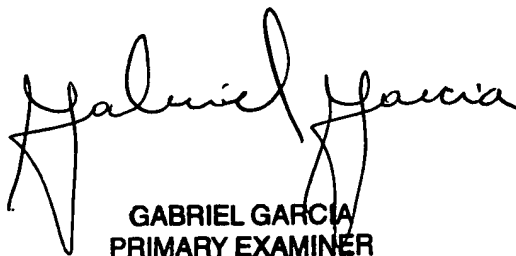

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
